

Electrode-electrolyte interface — Solution

X23 (2023) — English translation

A1

0.02 pts

Measure the inner diameter of the syringe D_0 and the distance L_0 between marks 0 mL and 20 mL.

Answer: \textbf{Answer: } $L_0 = 65$

A2

0.40 pts

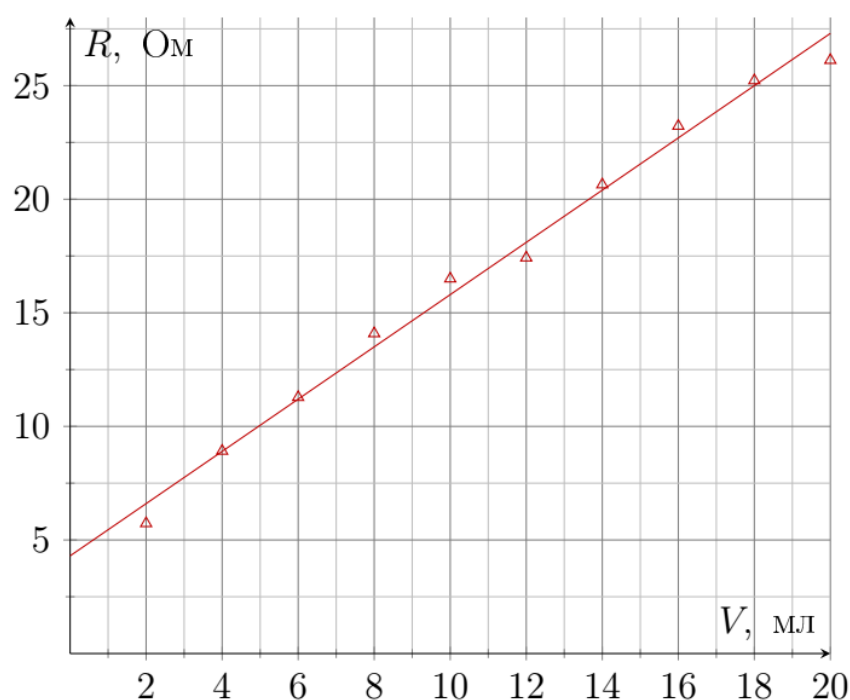

Make resistance measurements R corresponding to the positions of the syringe $V = 2, 4, \dots, 20$ mL.

A3

0.40 pts

Plot R versus V . Draw a smoothing straight line $R = R_1 + \alpha_1 V$. Calculate the values of parameters R_1 and α_1 .

Answer: \textbf{Answer: } $R_1 = 4.3$

B1

0.80 pts

For each of the prepared solutions, carry out a series of 4-ex measurements R from V .
