

Ball on graph paper

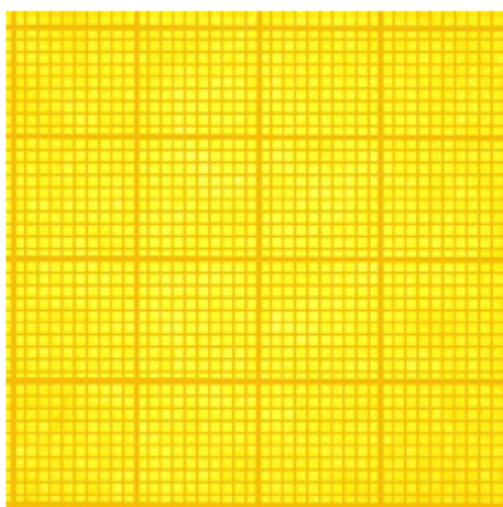

Y16 (2016) — English translation

The glass ball was placed on a sheet of graph paper.

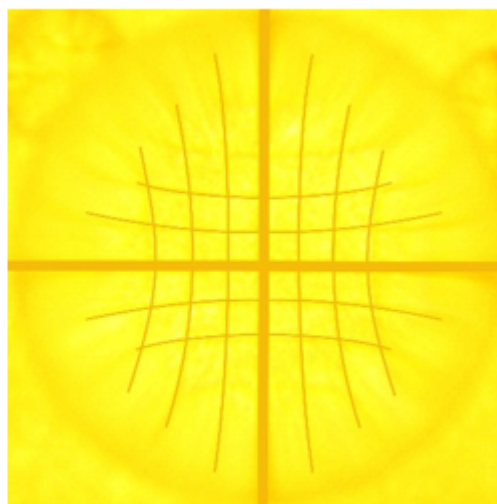

A1 Using the photographs below, calculate the refractive index of glass. Give calculation formulas. **4.00**

Note 1: You can use a ruler. Note 2: Because the camera is focused on the ball in the second photo, the graph paper protruding beyond the ball appears blurry.

Note 2: Because the camera is focused on the ball in the second photo, the graph paper protruding beyond the ball appears blurry.
